

For Immediate Release

Techsol Announces New ARM Based Medallion Computer Modules

www.techsol.ca

DELTA, BC., January 21, 2002 – Technical Solutions Inc. (Techsol) today announced its patent-pending, low-cost, high-performance, Medallion computer modules.

The Medallion computer modules, with bundled software, are designed to enable rapid development of complete embedded solutions for non-PC platforms, mobile devices, and internet appliances. The low cost of the Medallion modules, allows it's use in mass production of products.

Key features of the Medallion Computer Modules:

- Advanced RISC Machines CPU Modules
- On-Board Boot Memory
- On-Board RAM
- On-Board Bulk Storage
- High Performance, Small Footprint (2"x 2")
- Low Power, Long Battery Life
- Interchangeable modules allow multiple configurations and easy upgrades
- Linux pre-installed and ready to run
- Free Bundled Software

Full data sheet of the Medallion computer modules are available to selected customers upon request. Interested customers may email sales@techsol.ca to request the full data sheet. The request should include company name, contact information, intended products, development and production schedule with production quantity projection. Limited quantity of sample modules will be distributed to strategic customers. Production quantities are scheduled for late Q1 2002. Development using the Medallion modules is made easy with the availability of development kits.

About Technical Solutions Inc.

Technical Solutions, is a privately owned corporation that, offers combined hardware (HW) and software (SW) technologies directly to manufacturers of consumer products and other devices. Our combined HW and SW intellectual properties (IP) enable the deployment of new products in as little as 6 months from time of conception, including hardware and software customization plus custom plastics design and production.
