1 What's New?.....	3
--------------------	---

Techsol is a North American (NAFTA) corporation providing **low-cost out-sourcing of your embedded product, or ZigBee wireless adapter, design and board fabrication.** Our ability to **rapidly prototype** using our complete, RoHS-compliant SMT production line in-house is a key differentiator. Operating lead-free since December 2005, this line accelerates the development of products, and also provides low-cost pilot production.

<p><b>Techsol's Embedded Computer Products Division</b></p>  <p><b>Techsol's Medallion System</b> is a pioneer in Linux on ARM technology. Leverage our off-the-shelf <a href="#">Medallion Computer Modules</a> and <a href="#">development kits</a> to accelerate your development projects. Whether you just need a Computer-on-Module for your own <a href="#">semi-custom</a> design, or you need a <a href="#">turn-key solution</a>, Techsol's focused <a href="#">Hardware</a> and <a href="#">Software</a> expertise plus <a href="#">superb support</a> get you to market faster... <a href="#">more</a></p>	<p><b>Techsol's ZigBee Wireless Products Division</b></p>  <p>Techsol's <b>zPoint Products</b> division was created in March 2006 to <b>deploy robust, wireless technologies into the Building Automation market, as well as Industrial and Home Automation markets.</b> Techsol's Industrial and Security customers have been asking for low-cost, quality wireless communications systems for some time now. And our <b>advanced Java Gateways...</b> <a href="#">more</a></p>	<p><b>Contact Us</b></p> <table border="1"> <tr> <td>Tele-phone</td> <td><a href="tel:1888TECHSOL">1 888 TECHSOL</a></td> </tr> <tr> <td>Web</td> <td><a href="#">Contact form</a></td> </tr> <tr> <td>E#mail</td> <td><a href="mailto:sales@techsol.ca">&lt;sales@techsol.ca&gt;</a></td> </tr> </table>	Tele-phone	<a href="tel:1888TECHSOL">1 888 TECHSOL</a>	Web	<a href="#">Contact form</a>	E#mail	<a href="mailto:sales@techsol.ca">&lt;sales@techsol.ca&gt;</a>

We have published a <a href="#">press release</a> about our "Small TSC" (2.x# to 5# Touch#Screen Computers), which are described on the <a href="#">Small TSC product page</a>. And we'll follow with information about our "Medium TSC" products, with screens from 5# WVGA to 10.x#, as well as "Large TSC" products, which have 8# and larger displays. The main distinction between Medium and Large (besides size) is that the Medium line have a parallel RGB interface to the display, whereas the Large series use LVDS. That sounds like we'd only need a single display adapter board for LVDS displays but, unfortunately, variations in the touch#screen connectors and backlight requirements of different models of displays force us to use unique solutions for different models of display panels.</p>						

TFT LCD panels and optional touch screens.

In addition to new Hardware, there are lots of new Software developments too, including [Java SE support on the Touch#Screen Computer Modules.](#)

So stay tuned. There's lots more to come!
